

Standards Based Grading

What is standards based grading?

In a standards based system, teachers report what students know and are able to do relative to the KS Academic Standards. The system includes:

1. The improvement of student achievement of required Kansas targets in all content areas,
2. The mastery of defined learning targets instead of the accumulation of points,
3. The reporting of student achievement toward meeting learning targets at a given time by reflecting on mounting evidence based on various forms of assessments,
4. A record keeping system that provides teachers with information that allows the to adjust learning practices to meet the needs of students, and
5. A system that encourages student reflection and responsibility.

What are the purposes of standards based grading?

The purpose of standards based grading is to raise student achievement by clearly communicating students' progress toward learning targets. Standards based grading aligns grading with the state academic standards as measured by consistent and accurate student achievement data and common criteria for grading. SBG also accurately communicates achievement of learning targets to students, parents and educators. The influence of positive and consistent work habits on student learning is reported separately from the academics.

How does standards based grading work?

Traditional grading averages a student's achievement data with other characteristics, such as work habits. Standards based grading removes extraneous factors and focuses solely on a student's academic achievement and continued mounting evidence that indicates a true assessment of the child's present attainment of the learning targets. Other characteristics are reported separately.

How is standards based grading different?

The student's grade more accurately represents the progress toward mastery of standards than traditional grading does. Subject areas are subdivided into big ideas related to standards and their respective learning targets that students need to learn or master. Each target is assessed. Scores from activities that are provided solely for practice will not be included in the final assessment of the learning target. The influence of positive and consistent work habits on student learning is reported separately from the academics.

What are the advantages of standards based grading?

The learning targets are clearly articulated to the students throughout instruction. Parents can see which learning targets students have mastered and which ones need reteaching and relearning.

What are the disadvantages of standards based grading?

It's a change, and change takes time to build understanding for everyone involved. Traditional grading practices are ingrained in the community and they, too, will have to go through the change process.

What is the role of work completed outside of school in SBG?

The purposes for assigning work, regardless of whether it is completed in school or at home,
